**DETAILED ACTION**

***Election/Restrictions***

1. This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

- Species A - The embodiment shown on Figure 1.
- Species B - The embodiment shown on Figure 3.
- Species C - The embodiment shown on Figure 4.
- Species D - The embodiment shown on Figure 5.
- Species E - The embodiment shown on Figure 7.
- Species F - The embodiment described on page 11, lines 4-7.

Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Art Unit: 3724

2. The claims are deemed to correspond to the species listed above in the following manner:

Claim 54 appears to read on the species A and B.

Claims 57 and 100 appear to read on the species D.

Claims 59, 70-72, 75, 77-78, and 98 appear to read on the species A and C.

Claims 60, 73, 76, 80, 90-96, and 101-102 appear to read on the species A-D.

Claims 61 and 74 appear to read on the species E.

Claims 63, 65-67, 83-88, 97, and 99 appear to read on the species C and D.

Claims 79 and 81-82 appear to read on the species B.

Claim 89 appears to read on the species F.

The following claim(s) are generic: 52-53, 55-56, 58, 62, 64, and 68-69.

3. The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons: The species A contains a specific driving arrangement, the species B contains timing drive belt means, the species C and D contain sensing means and microprocessor, the species E contains conveyor belts, and the species F contains gripper bars.

4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to S. Choi whose telephone number is 703-306-4523. The examiner can normally be reached on Monday thru Friday between 9am and 5pm. If
